

# Indian Materialism - Temporalities and Dynamics

By Shomit Sirohi

Introduction

To follow this model of temporality keep following forms of temporality which are also dynamics of temporality – which becomes lesser dynamics and faster dynamics of then also daily life rhythms – I mean think of taking a bus and reaching off at a institute as a temporality and cross-

section this with so many options.

I. Abstract Time and Concrete Time - Combined model with concrete complex cross-section which becomes a model of time and temporality

And so in fact abstract time exists in Postone

and concrete time,  
which is then based on  
abstract labour and  
concrete labour.

Now if we add Althusser  
and complex essential  
cross-section it becomes  
a complex integration to  
this model of time.

## II. Sketches therefore of temporalities

Now it is all  
temporalities, that

become also plural  
temporalities – from  
Vittorio Morfino –

I. Connexio and  
Singularities

II. Plural Temporalities

From Aristotle's  
threshing and rain in  
the countryside to in  
fact we add cultivation  
and harvesting perhaps.
